The lot secured is deemed exceedingly desirable and the price paid—\$1,050—is considered very reasonable. The committee on plans have already received communications from two architects desiring to submit drawings. It is probable that the building will be of three stories, with stores upon the ground floor, a commodious hall in the second story, and above rooms for Masonic and other lodge purposes.

The Corcoran Art School. The Corcoran School of Art closed its annual session on June 30. Although this is only the second year of the occupation of the temporary tion of its purport, as some have assued me they thought it would lead through a free dis-cussion to a fair consideration of the whole matter in all its bearings. From the spirit and school building erected on 17th street shortly after the death of Mr. Corcoran, the improvement in work and attendance has been very satisfactory. During the last months of the year the rooms were filled to their utmost and year the rooms were filled to their utmost and applications were continually received for admittance from all parts of the country. There are now in most of the states graduates of the "Corcoran" who are earning their living by drawing, painting and teaching. The board of trustees are pushing to rapid completion the plans and specifications of the new gallery and school, and it is hoped that within a year or eighteen months the new building will be nearly finished. When completed the capacity of the school will be largely increased. Heretofore it has been hardly possible to do more than pursue a course of rigid drawing. With more room of course other branches will be taken up and the scope of the school largely widened. Mr. Andrews, the director, sailed for his annual European tour on July 5.
